Qualifications Profile

Innovative professional with a sharp technical acumen, passion for software development, and hands-on experience in architectural design, poised to leverage design and coding expertise in an entry-level Developer role.

- Familiar with the entire software development process from design and development to testing and deployment. Well-schooled in translating UX concepts into code, developing new user features, crafting code for various software functions, and testing functionality of applications.
- Basic knowledge of standard programming algorithms, design patterns, and object-oriented software designs. Skilled in preparing drawings and reports, consulting directly with clients, coordinating multiple projects simultaneously, and following client guidelines and industry standards. Curiosity to learn new tools and technologies.
- Motivated to collaborate with designers, developers, clients, and other product stakeholders to enhance product functionality and reliability. Creative problem solver and dedicated team player with a 'can-do' attitude and ability to propel projects and teams to peak results while working with minimal supervision.
- Strong communication, organizational, and problem-solving skills. Capacity to work well under pressure, quickly learn job functions, and effectively handle a variety of tasks while remaining detail oriented. Thrive in fast-paced, high-growth environments with tight deadlines and shifting priorities. Bilingual in English and Vietnamese.

Core Technologies

Frameworks:	Express.js, React.js, Node.js
Databases & Libraries:	MongoDB, Mongoose, Heroku
Software & Tools	Figma, VScode, Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Adobe Lightroom, Adobe Premium Pro, Adobe After Effect, Adobe XD, Revit, AutoCad, 3DsMax

Education and Credentials

Master of Art in Web/UX UI Design Degree (expected Dec 2022) | Academy of Art University – San Francisco, California

Bachelor of Architecture Degree - B.Arch (2018) | Academy of Art University – San Francisco, California

Professional Development

Full Stack Developer - Coding Bootcamp – UC Berkeley Extension (June 2020)

Experience Highlights

INTERN FRONT-END DEVELOPER | MyCodi, San Leandro, California (September 2020 – July 2021)

- Assisted in building beautiful user interfaces for [my-codi.com](#) from Ideate phase to Launch.
- Assisted in building a Survey feature (Design Phase) for IOS/Android using Ignite Bowser boiler plate for React Native.
- Demonstrated outstanding communication, organization, and project management talents while leveraging a keen eye for design and achieving technical proficiency across a variety of design programs.

ARCHITECTURAL DESIGNER | Holscher Architecture, Belvedere Tiburon, California (July 2017 – July 2021)

Coordinated architectural design and tenant improvement projects from start to construction for the company providing high-end residential designs. Held concurrent responsibility for conducting site surveys, consulting with clients, preparing feasibility reports, and supporting licensed architects. Conducted site surveys and assisted managers in design efforts.

Additional experience as a Freelance Photographer and Videographer: Demonstrated solid skills in photography with great sense of compositions, strong on-hands camera control, and a good feel for aesthetics.
